REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Environmental Science Services Administration State Climatologist, 457 Federal Office Building, 50 Fulton Street, San Francisco, California 94102, or to any Weather Bureau Office near you. Additional precipitation data are contained in "HOURLY PRECIPITATION DATA CALIFORNIA" and "Storage-Gage Precipitation Data for Western United States".

DIMENSIONAL UNITS Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F. In 'Supplemental Data' table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

OBSERVATION TIME The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m., P.S.T., except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB, which are taken at 6:00 a.m., P.S.T., and Mt. Shasta WB City at 8:00 a.m., P.S.T. Data in the 'Extremes' table, 'Daily Precipitation' table, 'Daily Temperature' table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the 'Evaporation and Wind' table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations, consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for January 1941.

STATION NAMES Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

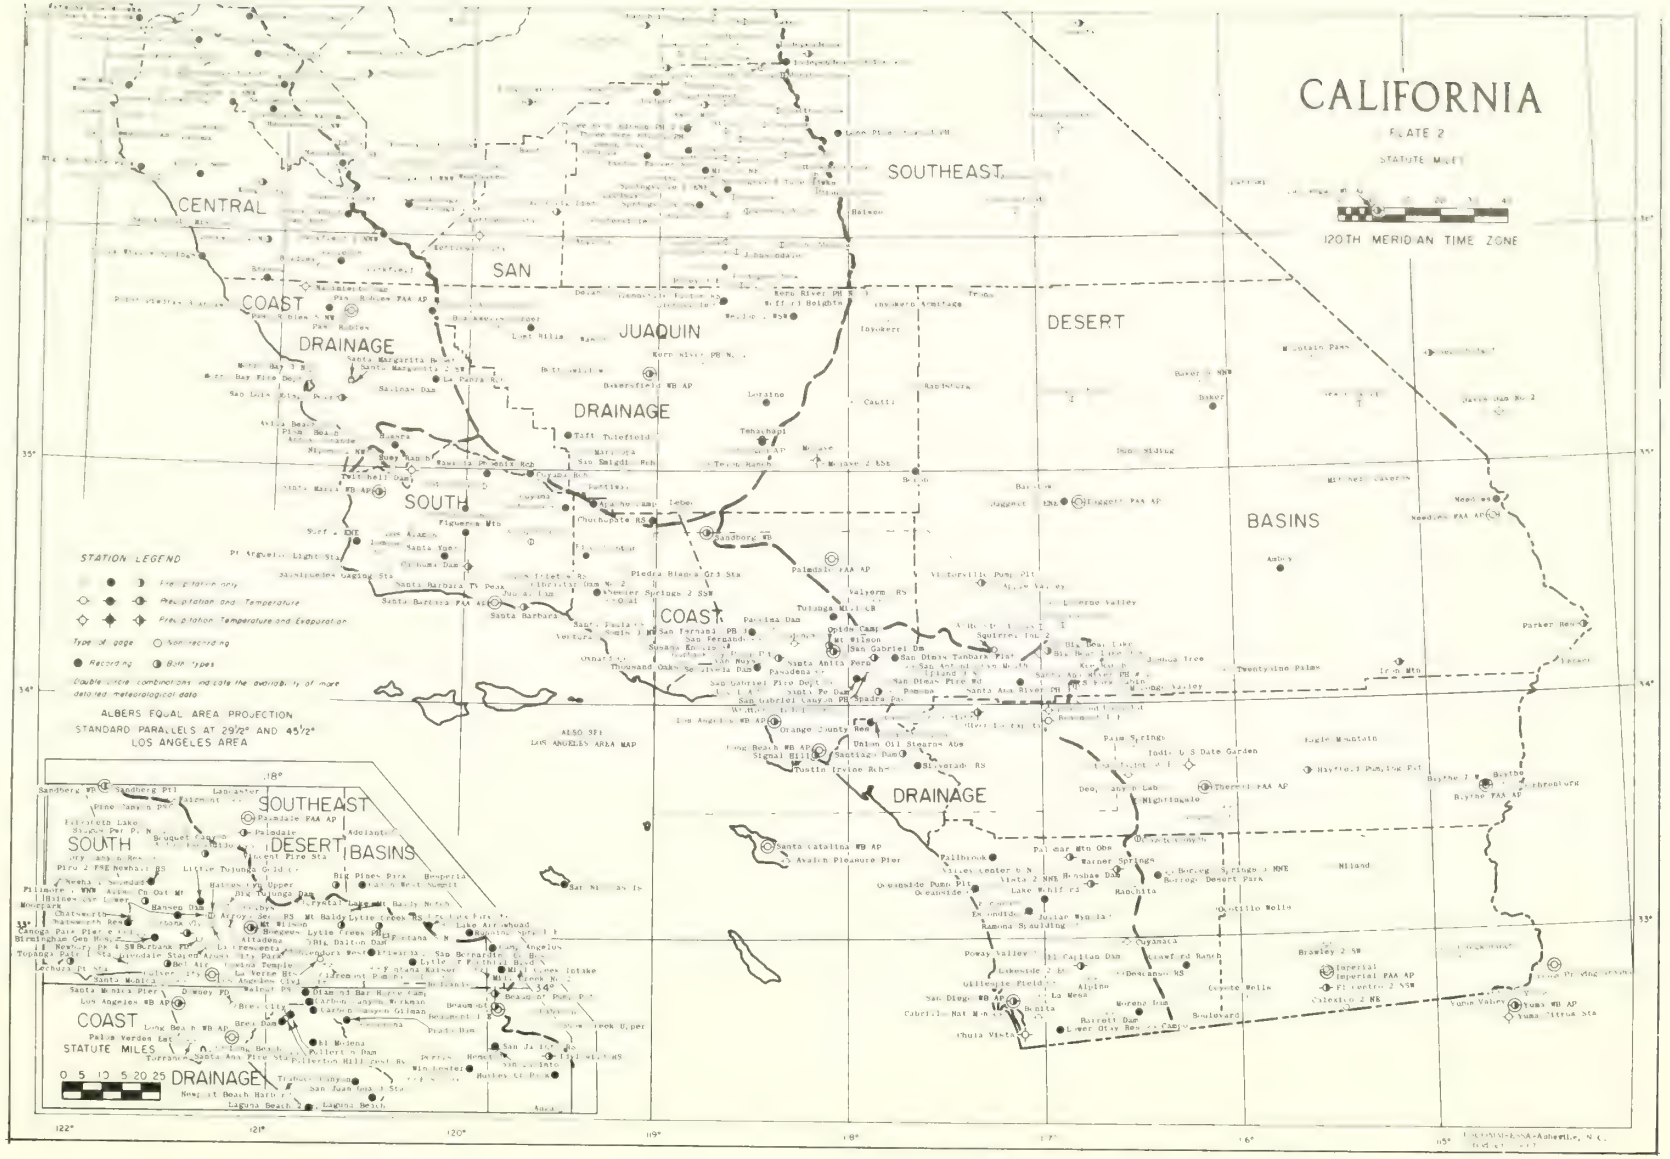
IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

- No record in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, [illegible]
- No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.
- \+ Also on an earlier date or dates.
- ** Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.
- \# Amount included in following measurement, time distribution unknown.
- // Gage is equipped with a windshield.
- B Adjusted to a full month.
- D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
- M One or more days of record missing, if average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
- R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.
- T Trace, an amount too small to measure.
- V Includes total for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

- AR This entry in time of observation column in Station Index means after rain.
- C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in "Climatological Data" bulletin they are from a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in the "Hourly Precipitation Data" bulletin.
- G "Soil Temperature" table.
- H "Snowfall and Snow on Ground" table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
- I "Supplemental Data" table.
- S Storage precipitation station. Precipitation measurements, made at irregular intervals will be published later in "Precipitation Data from Storage-Gage Stations" Bulletin.
- SS This entry in time of observation column in Station Index means observation made near sunset.
- VAR This entry in time of observation column in Station Index means variable.
- \# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.

Stations appearing in the tables with no data were either missing or received too late to be included in this issue.



General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication "Substation History" for this State, price $1.25. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at the address shown above.

Subscription price [illegible] cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402

CALIFORNIA - OCTOBER 1968

SPECIAL WEATHER SUMMARY

Temperatures were near or above normal on the south coast and over and east of the Sierras. Elsewhere they were below normal. Monthly averages were more than 1° below normal over most of the interior valley and the northern and central coasts. Fresno reported the maximum on the 28th equalled the record for that date. The Long Beach station, out of phase with others in that area, reported the lowest monthly minimum since 1955 and the lowest mean maximum and mean temperature since 1962.

Precipitation was lighter than normal over most of the State, but a band of greater than normal precipitation spread from Pt. Arguello across the San Joaquin Valley in the vicinity of Fresno and into the central Sierras. Excesses for the month amounted to 1 to 2 inches through this zone. Isolated stations in the southeastern desert reported heavy precipitation from scattered thundershowers. Fresno reported the wettest October since 1936 and set a new record of 24-hour rainfall for the date on the 13th. Long Beach had the greatest October precipitation since 1963.

Strong winds from thundershowers were reported in parts of the Los Angeles basin and the southeastern desert on the 2d and 3d of the month. A frontal system moving across the northern and central part of the State on the 11th and 12th caused strong winds in the Sacramento Valley and the northern Sierras. Santa Ana conditions produced strong winds in southern California on the 14th, 15th, and 16th, and to a lesser degree on the 23d and 24th. Elk Valley reported strong winds on the 14th, and San Francisco Airport observed them on the 17th. San Diego reported twice as many days with heavy fog as is normal for the month.

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Environmental Science Services Administration State Climatologist, [illegible] Federal Office Building, 50 Fulton Street, San Francisco, California 94102, or to any Weather Bureau Office near you. Additional precipitation data are contained in "HOURLY PRECIPITATION DATA - CALIFORNIA" and "Storage-Gage Precipitation Data for Western United States".

DIMENSIONAL UNITS: Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F. In "Supplemental Data" table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

OBSERVATION TIME: The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time. Snow on ground in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4:00 a.m., P.S.T., except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB AP, which are taken at 6:00 a.m., P.S.T., and Mt. Shasta WB City at 8:00 a.m., P.S.T. Data in the "Extremes" table, "Daily Precipitation" table, "Daily Temperature" table, "Evaporation and Wind" table, and snowfall in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

WATER EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations, consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

SNOWFALL: Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for January 1941.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES: Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- No record in the "Supplemental Data" table, "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, [illegible]

 No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.

\+ And also on an earlier date or dates.

\++ Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.

* Amount included in following measurement, time distribution unknown.

 [illegible] pan is equipped with a windshield.

B Adjusted to a full month.

E Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)

T Trace, an amount too small to measure.

V Includes total for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

AR This entry in time of observation column in Station Index means after rain.

\+ Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in "Climatological Data" bulletin they are from a separate non-recording gage, except where indicated by reference "R". Such amounts may differ from amounts published from the recording gage in the "Hourly Precipitation Data" bulletin.

C "Soil Temperature" table.

H "Snowfall and Snow on Ground" table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.

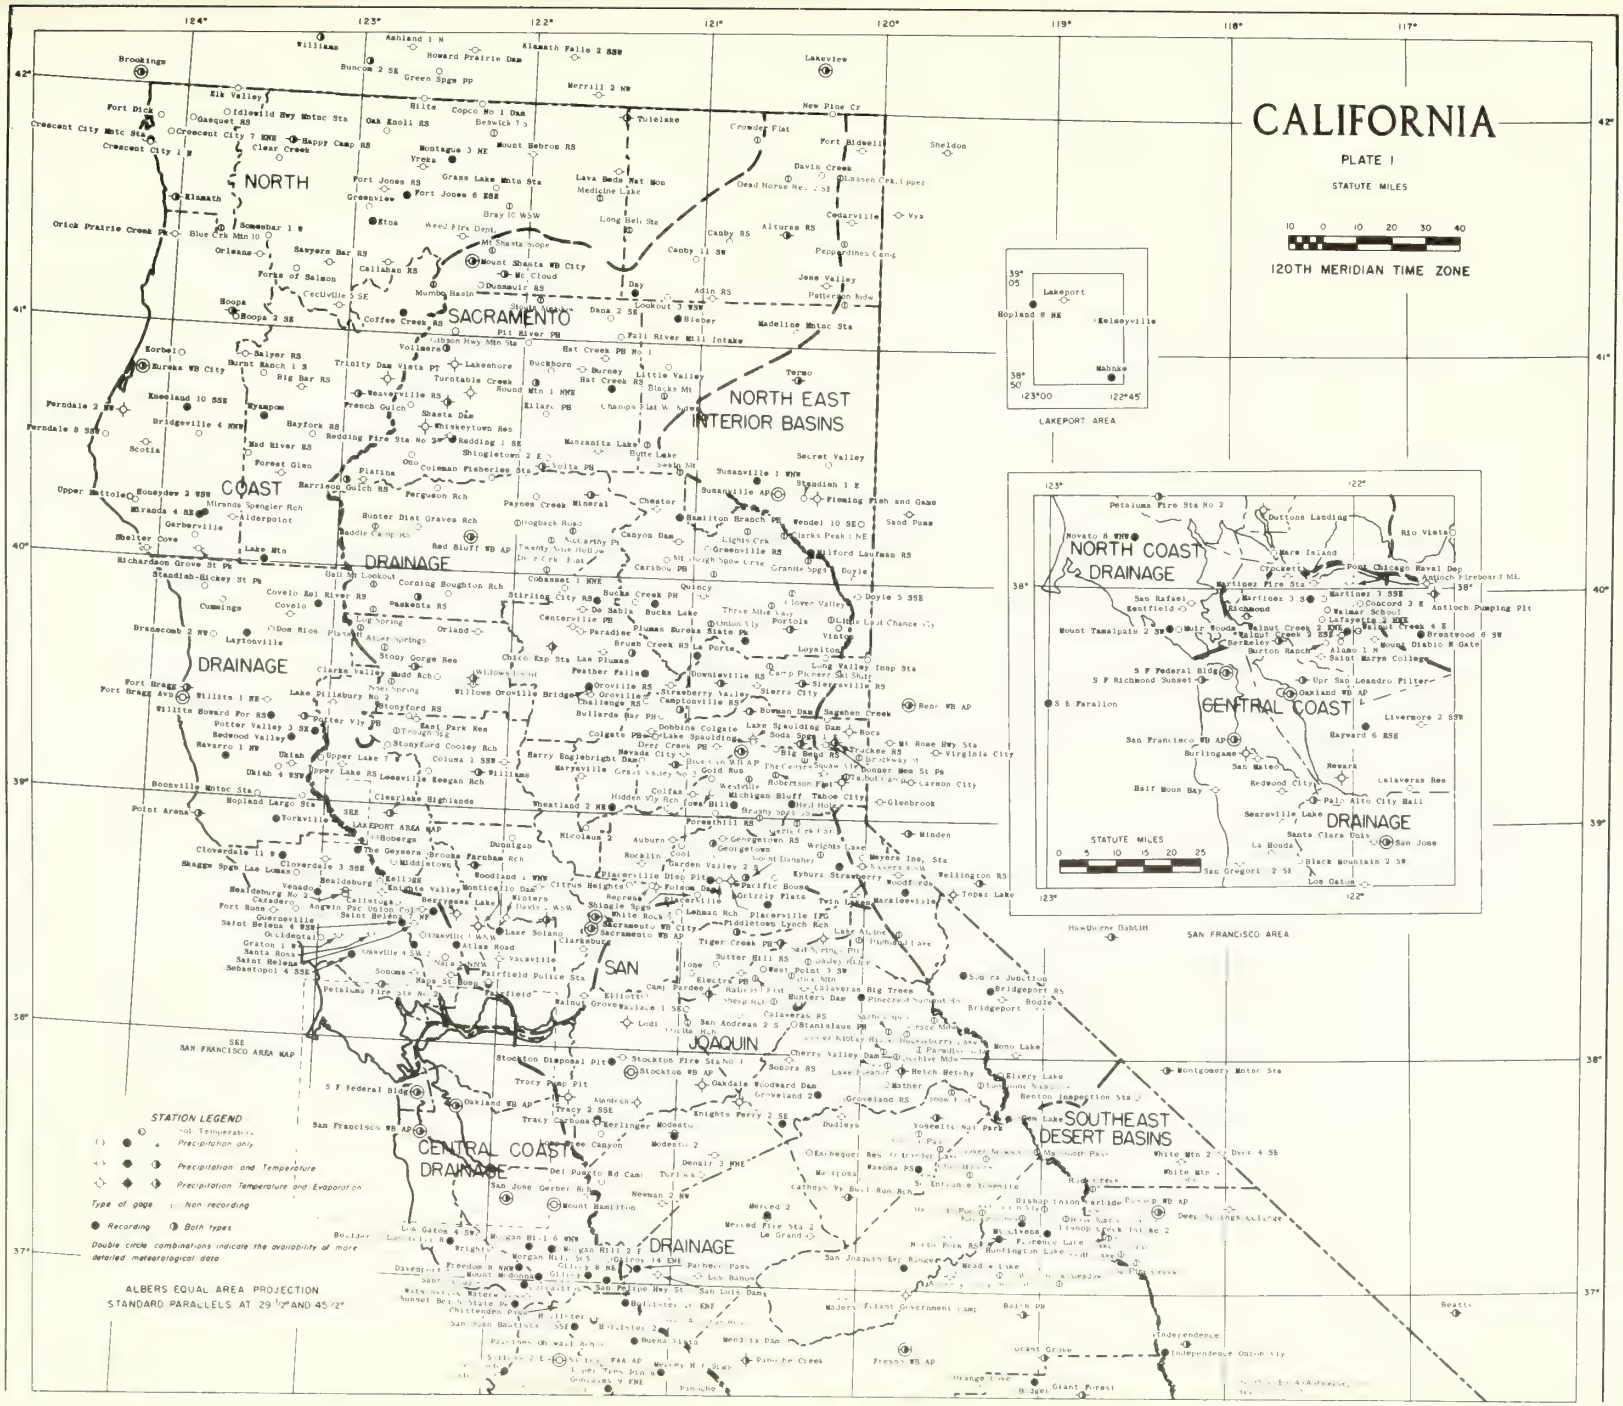
† "Supplemental Data" table.

S Storage precipitation station. Precipitation measurements, made at irregular intervals will be published later in "Precipitation Data from Storage-Gage Stations" Bulletin.

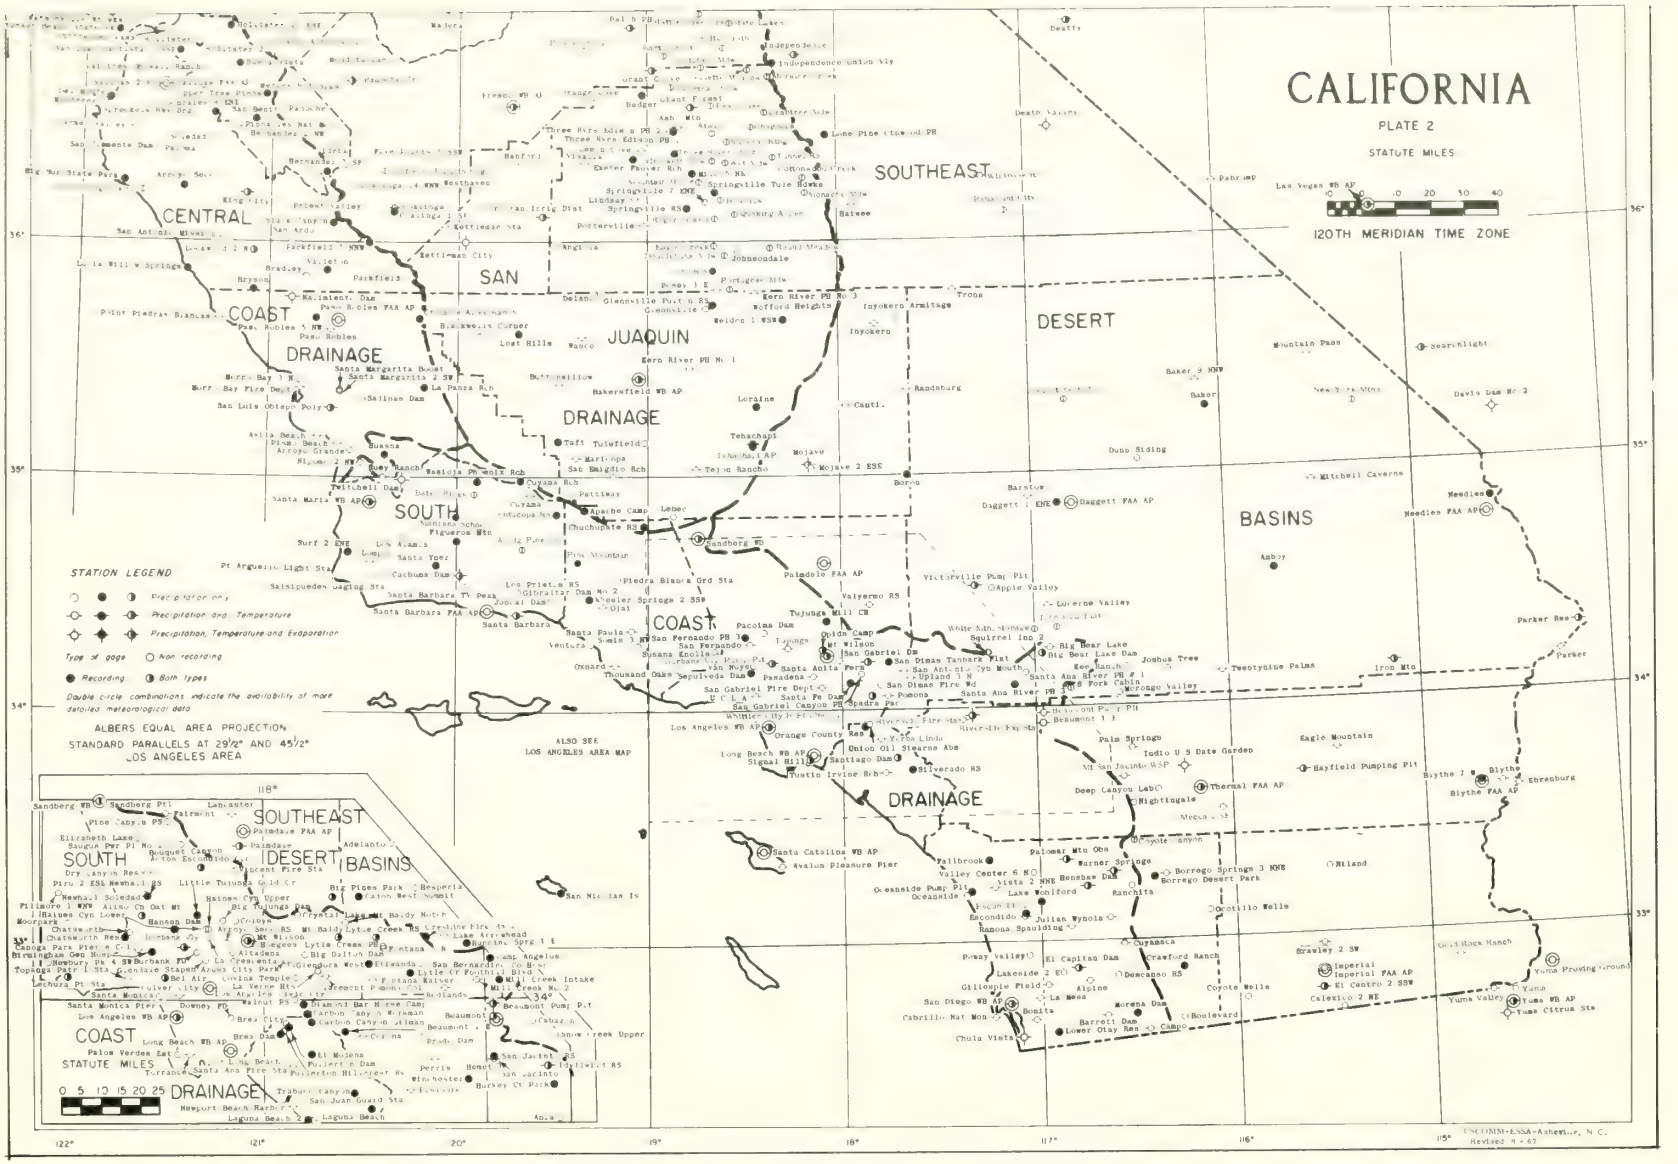
SS This entry in time of observation column in Station Index means observation made near sunset.

VAR This entry in time of observation column in Station Index means variable.

\# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.



Stations appearing in the tables with no data were either missing or received too late to be included in this issue.



General weather conditions in the U. S. for each month are described in the publications: MONTHLY WEATHER REVIEW, CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication "Substation History" for this State, price $1.25. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at the address shown above.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

REFERENCE NOTES

[illegible] information regarding the climate of California may be obtained by writing to the Environmental Science Services Administration State Climatologist, [illegible] Fulton Street, San Francisco, California 94102, or to any Weather Bureau Office near you. Additional precipitation data are [illegible] DATA [illegible] and Storage-Gage Precipitation Data for Western United States.

[illegible] UNITS. Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and [illegible] in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65° F. In "Supplemental Data" [illegible] entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

OBSERVATION TIME. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight [illegible] in the "Snowfall and Snow on Ground" table is at observation time for all except Weather Bureau and FAA stations. For these [illegible] ground values are at [illegible] a.m., P.S.T. except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB, which are taken at 6:00 a.m., P.S.T., and Mt. Shasta WB [illegible] a.m., P.S.T. Data in the "Extremes" table, "Daily Precipitation" table, "Daily Temperature" table, "Evaporation and Wind" [illegible] in the "Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

[illegible] is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" table. Max and Min in "Evaporation and Wind" table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

[illegible] EQUIVALENT values published in the "Snowfall and Snow on Ground" table are the water equivalent of snow, sleet, or ice on the ground. Samples for [illegible] are taken from different points for successive observations; consequently, occasional drifting and other causes of local variability [illegible] may result in apparent inconsistencies in the record.

[illegible] Entries of snowfall in the "Climatological Data" table, the "Snowfall and Snow on Ground" table, and in the "Seasonal Snowfall" table, include [illegible] Entries of snow on ground include snow, sleet, and ice.

[illegible] climatological standard normals based on the period 1931-1960.

[illegible] effective with data for January 1941.

STATION NAMES. Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES. Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

[illegible] monthly precipitation totals may be found in the annual issue of this publication.

[illegible] THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

- [illegible] "Daily Precipitation" table, "Evaporation and Wind" table, "Snowfall and Snow on Ground" table, [illegible]

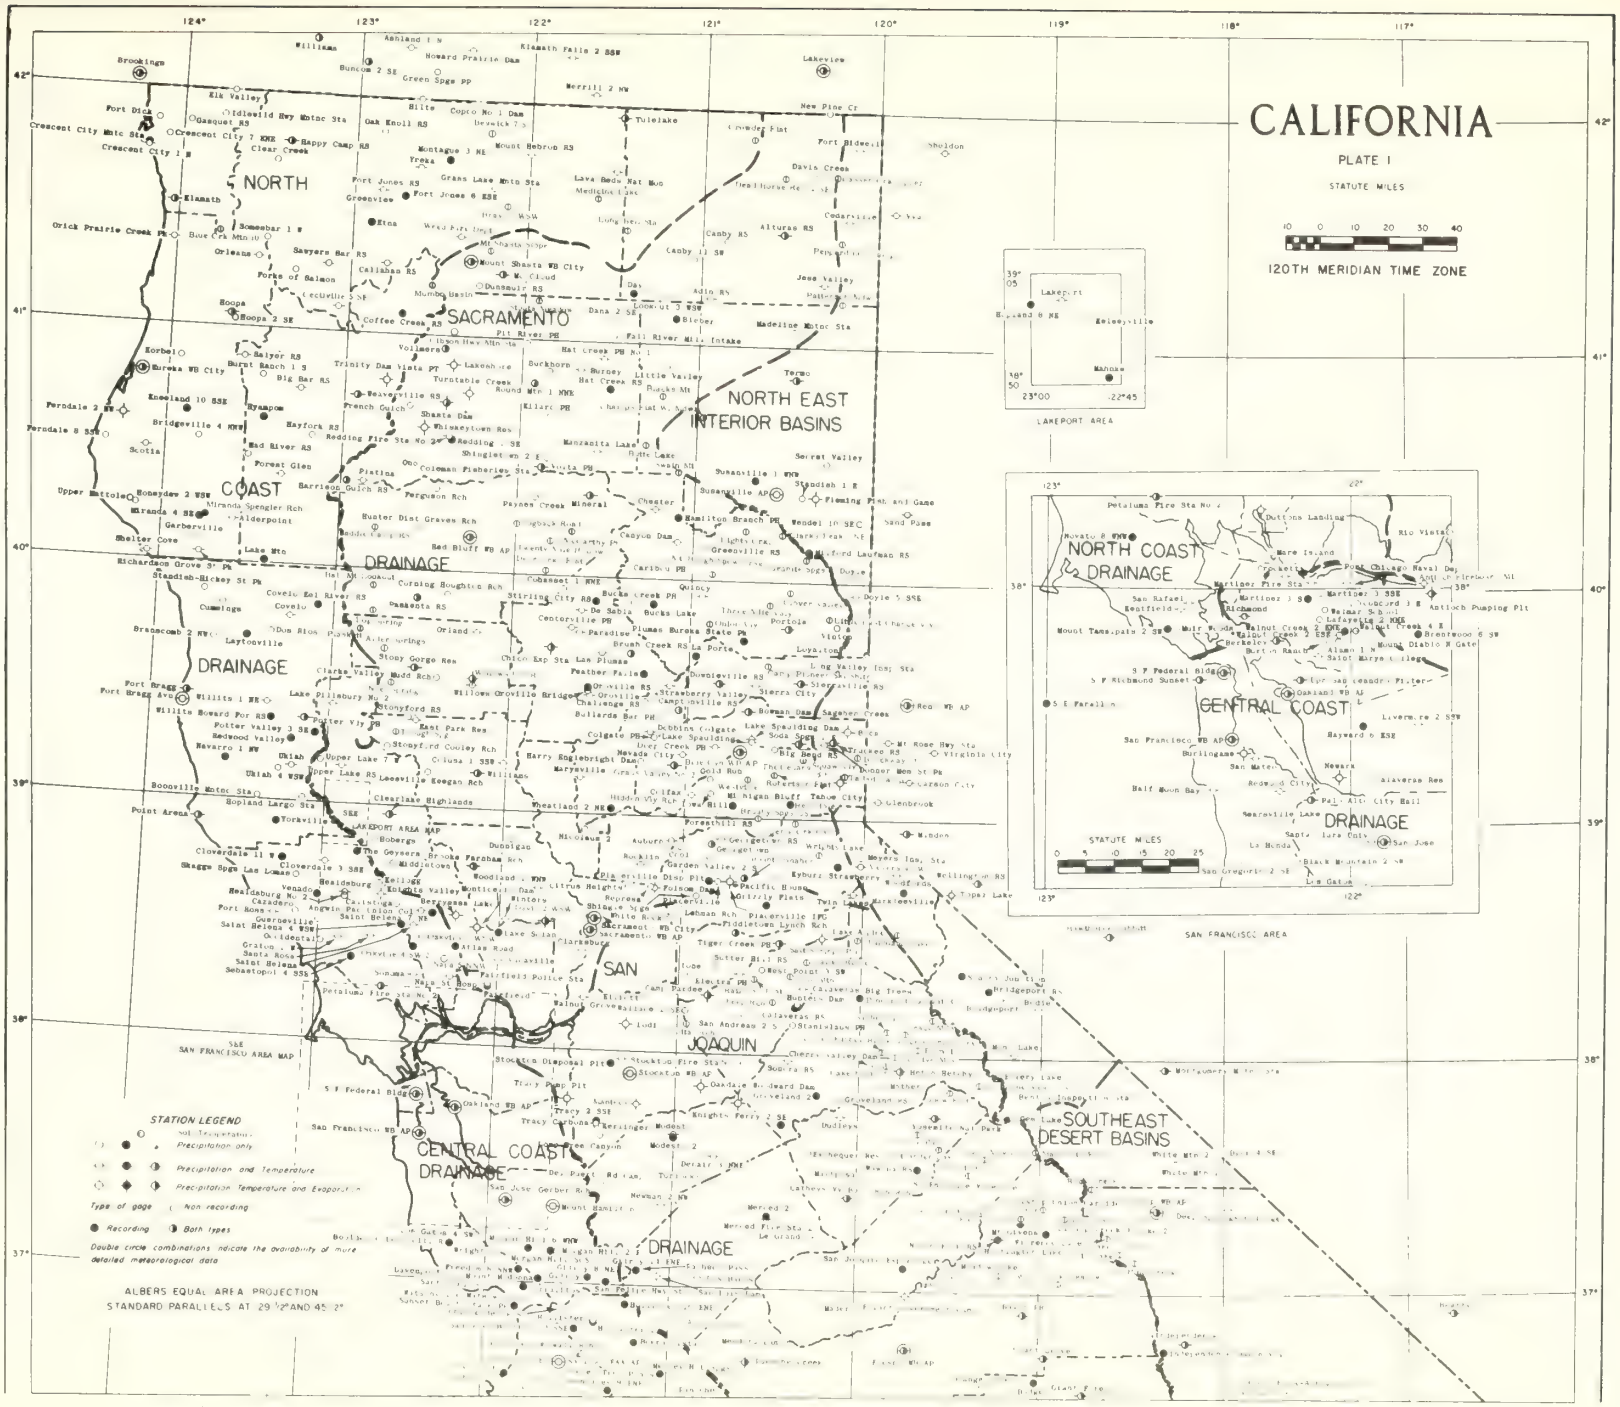
  No record in the "Climatological Data" table and the "Daily Temperature" table is indicated by no entry.

  [illegible] earlier date or dates.

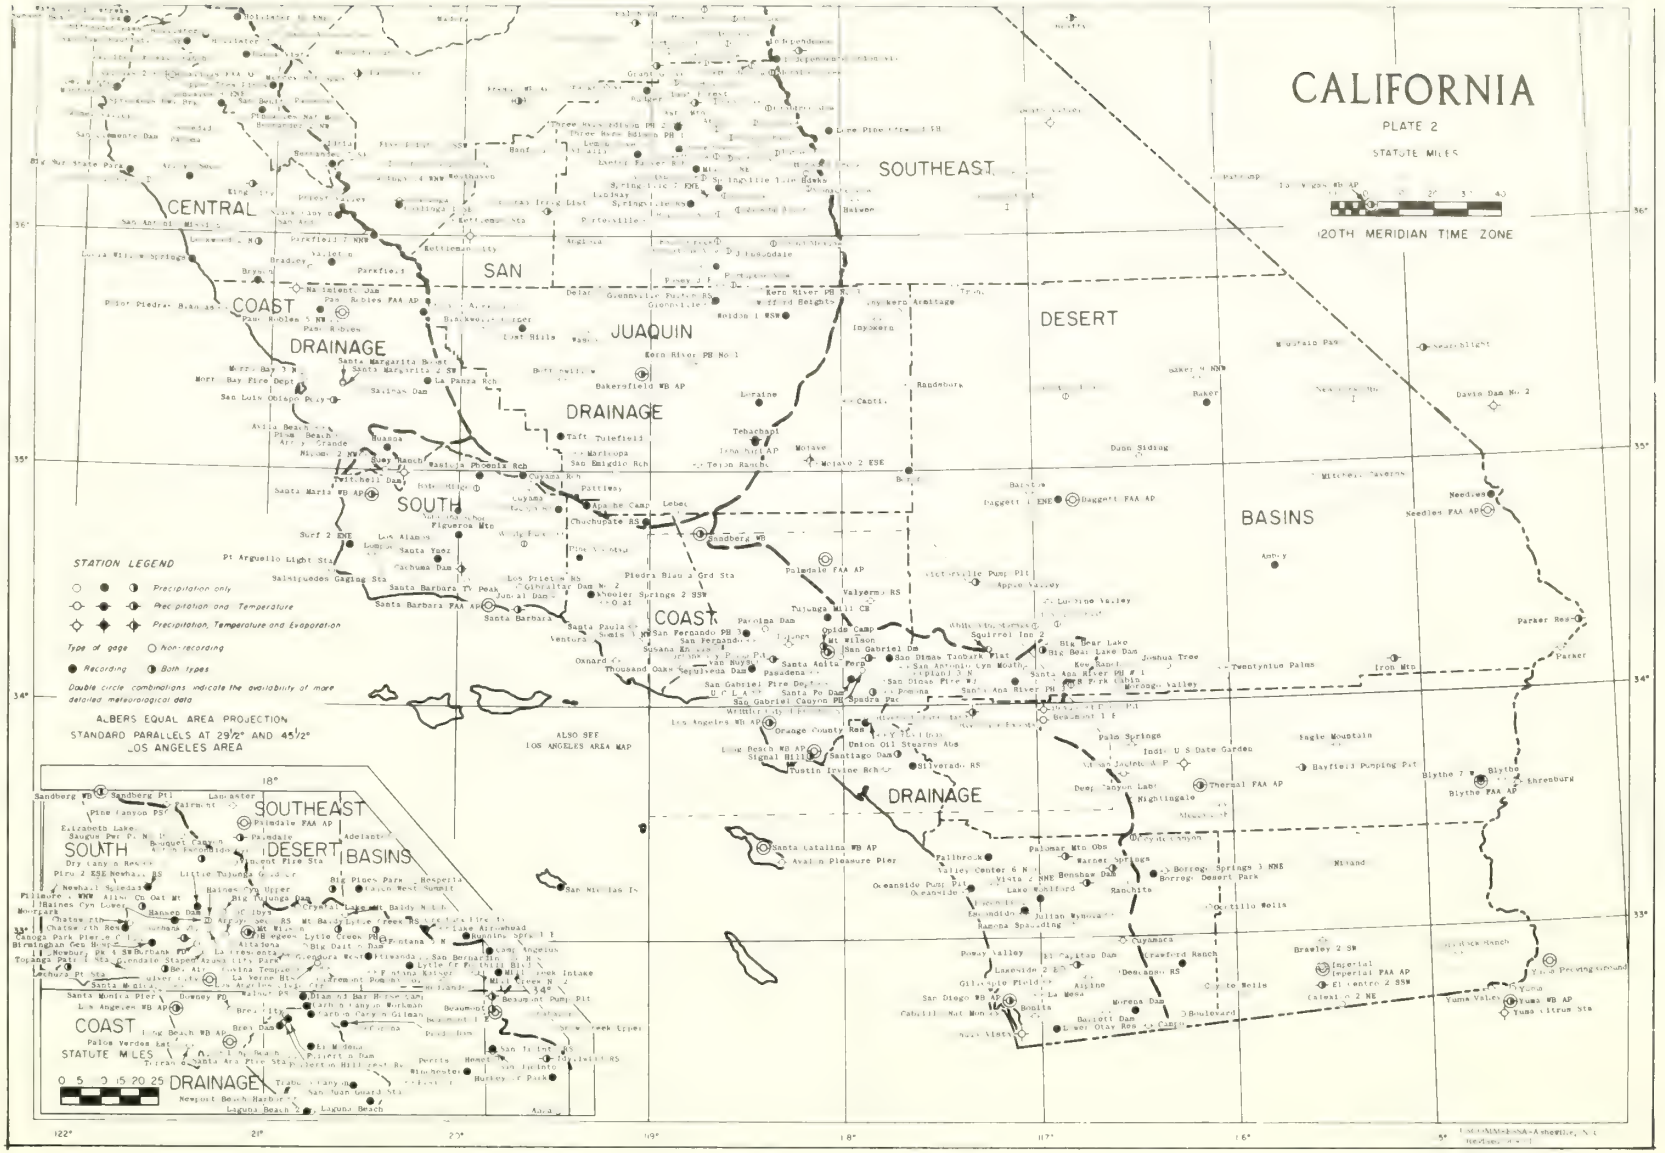
- .. Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.
- * Amount included in following measurement, time distribution unknown.
- [illegible] equipped with a windshield.
- B Adjusted to a full month.
- [illegible] Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
- M [illegible] missing. If average value is entered, less than 10 days record is missing. See "Daily Temperature" table for detailed [illegible] degree day data, if carried for this station, have been adjusted to represent the value for a full month.
- [illegible] Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
- T Trace, an amount too small to measure.
- V Includes total for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

- AR This entry in time of observation column in Station Index means after rain.
- [illegible] Recording rain gage station. Hourly precipitation values are processed for special purposes, and are published later in the "Hourly Precipitation Data" bulletin. If daily amounts are published in "Climatological Data" bulletin they are from a separate non-recording gage, except where indicated by reference [illegible]. Such amounts may differ from amounts published from the recording gage in the "Hourly Precipitation Data" bulletin.
- C "Soil Temperature" table.
- H "Snowfall and Snow on Ground" table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
- J "Supplemental Data" table.
- [illegible] Storage precipitation station. Precipitation measurements, made at irregular intervals will be published later in "Precipitation Data from Storage Gage Stations" bulletin.
- SS This entry in time of observation column in Station Index means observation made near sunset.
- VAR This entry in time of observation column in Station Index means variable.
- \# Thermometers are generally exposed in a shelter located a few feet above sod-covered ground, however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.



[illegible] appearing in the Index [illegible] data were either missing or received too late to be included in this issue.



[illegible] weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, CLIMATOLOGICAL DATA NATIONAL SUMMARY, [illegible] STORM DATA [illegible] which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Information concerning [illegible] of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication "Substation History" for this state, [illegible] $[illegible].25. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data [illegible]. These publications may be obtained from the Superintendent of Documents at the address shown above.

Subscription Price: 20 cents per copy, monthly and annual; $2.[illegible] per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

CALIFORNIA - DECEMBER 1968

SPECIAL WEATHER SUMMARY

December was a very cold month over California, with most stations reporting negative departures of more than 2°, and some in excess of 7°. In the north, Mt. Shasta reported the second coldest December since 1948, and the third coldest in 41 years. Blue Canyon had the coldest December since 1951; San Francisco reported the coldest since 1965 and the third coldest since 1932. At Sandberg it was the second coldest December on record; the 5-day period from the 19th through the 23d averaged 16° below normal. At Los Angeles there were no days during the month with mean temperatures above normal; at San Francisco there were only 3; Red Bluff, Bishop, and San Diego had 4 days each; Mt. Shasta, Sacramento, and Fresno had 5. Several new low temperature records were established. The minimum reading at Los Angeles Airport was 4° colder than the lowest previously recorded in December, and Long Beach, also, had the lowest December reading of record. The maximum at Los Angeles on the 21st was the lowest ever recorded on that date.

In the southern part of the State, and in a few areas of the central region, precipitation was less than normal for the month. Elsewhere, totals were greater than normal; some points in the northern mountains received nearly twice the expected amount. This, combined with the cold weather, resulted in the measurement of greater snowfall amounts than usual. Mt. Shasta received the greatest December snowfall since 1952 and Red Bluff the greatest since 1931. Even as far south as Fresno, snowfall was the heaviest since 1911.

San Francisco reported the highest average wind speed since 1964. At Citrus Heights a local windstorm damaged patios, fences, and a garage to the extent of about $5,000 on the 1st. Cold and fog on the 7th and 8th resulted in a new record gas consumption for the northern California area. A freeze in the southern California area damaged flower crops, citrus, and avocados on the 20th, 21st, and 22d; damages were estimated at nearly $20,000,000. Heavy snow on the 23d and 24th, centered in the Redding area, resulted in one death from heart attack and one injury from the collapse of a roof. Damage was reported at about $3,000,000. The same snowstorm closed transcontinental highways over the Sierras for periods of several hours.

JUNE 1968	DAILY TEMPERATURE	SOUTH COAST DRAINAGE 06	LONG BEACH	DELETE ALL MAXIMUM & MINIMUM TEMPERATURES.
JUNE 1968	DAILY TEMPERATURE	SAN JOAQUIN DRAINAGE 05	PANOCHE CREEK	DELETE MAXIMUM & MINIMUM TEMPERATURES 25TH THRU 30TH, AVERAGE MAXIMUM 92.1, AVERAGE MINIMUM 56.9
JUNE 1968	EVAPORATION & WIND	SAN JOAQUIN DRAINAGE 05	PANOCHE CREEK	DELETE EVAPORATION, WIND MOVEMENT, MAXIMUM & MINIMUM WATER TEMPERATURES 25TH THRU 30TH; TOTAL WIND MOVEMENT 3028, EVAPORATION 15.81, AVERAGE MAXIMUM & MINIMUM WATER TEMPERATURES 89.7 & 58.3
JUNE 1968	ALL TABLES	SAN JOAQUIN DRAINAGE 05	PANOCHE CREEK	DELETE ALL DATA FROM 25TH THRU 30TH; THIS DATA TO BE PUBLISHED IN DELAYED DATA UNDER LITTLE PANOCHE DETENTION DAM
JULY & AUG 1968	ALL TABLES	SAN JOAQUIN DRAINAGE 05	PANOCHE CREEK	DATA LISTED UNDER PANOCHE CREEK SHOULD READ LITTLE PANOCHE DETENTION DAM
JULY 1968	CLIMATOLOGICAL DATA	SOUTH COAST DRAINAGE 06	LONG BEACH	AVERAGE MAXIMUM TEMPERATURE, AVERAGE MINIMUM TEMPERATURE, AVERAGE TEMPERATURE, HIGHEST & LOWEST TEMPERATURE, DEGREE DAYS, & NUMBER OF DAYS WITH 90° OR MORE,MISSING
JULY 1968	DAILY TEMPERATURE	SOUTH COAST DRAINAGE 06	LONG BEACH	DELETE ALL MAXIMUM & MINIMUM TEMPERATURES, AVERAGE MAXIMUM & MINIMUM MISSING
JULY 1968	SEASONAL	SOUTH COAST DRAINAGE 06	LONG BEACH	TOTAL DEGREE DAYS FOR MAY, JUNE, & JULY SHOULD BE MISSING
AUGUST 1968	CLIMATOLOGICAL DATA	CENTRAL COAST DRAINAGE 04	SALINAS 2 E	PRECIPITATION TOTAL .06, DEPARTURE FROM NORMAL .06, GREATEST DAY OF PRECIPITATION .06 ON 19TH
AUGUST 1968	CLIMATOLOGICAL DATA	NORTHEAST INTERIOR BASIN 03	SUSANVILLE AP	AVERAGE MAXIMUM 80.9, AVERAGE MINIMUM 47.5, AVERAGE TEMPERATURE 64.2, DEPARTURE FROM NORMAL -3.8, TOTAL DEGREE DAYS 106
AUGUST 1968	DAILY PRECIPITATION	SOUTH COAST DRAINAGE 06	NEWHALL SOLEDAD FC32CE	TOTAL PRECIPITATION .32, AMOUNT ON 6TH .32
AUGUST 1968	DAILY PRECIPITATION	CENTRAL COAST DRAINAGE 04	SALINAS 2 E	TOTAL .06, AMOUNT ON 19TH .06
AUGUST 1968	ALL TABLES	SOUTH COAST DRAINAGE 06	SAN NICOLAS ISLAND	DELETE ALL DATA FROM AUGUST BULLETIN, SEE DECEMBER DELAYED DATA; JULY PUBLISHED AS AUGUST
AUGUST 1968	DAILY TEMPERATURE	NORTHEAST INTERIOR BASIN 03	SUSANVILLE AP	MAXIMUM ON 31ST 93, MINIMUM ON 31ST, AVERAGE MAXIMUM 80.9, AVERAGE MINIMUM 47.5
AUGUST 1968	EVAPORATION & WIND	SACRAMENTO DRAINAGE 02	WILLOWS	EVAPORATION ON 30TH *, 31ST .42, TOTAL EVAPORATION 8.75
AUGUST 1968	ALL TABLES	SAN JOAQUIN DRAINAGE 05	THREE RIVERS EDISON PH #2	DELETE DATA; SEE DELAYED DATA FOR CORRECT DATA
AUGUST 1968	EVAPORATION & WIND	SACRAMENTO DRAINAGE 02	PLACERVILLE IFG	WIND MOVEMENT ON 31ST 24, EVAPORATION .26;TOTAL WIND MOVEMENT 830, EVAPORATION 7.06
SEPTEMBER 1968	CLIMATOLOGICAL DATA	NORTH COAST DRAINAGE 01	POTTER VALLEY P H	TOTAL PRECIPITATION .11, GREATEST DAY OF PRECIPITATION .11 ON 14TH, NUMBER OF DAYS WITH PRECIPITATION .10 OR MORE 1, DEPARTURE FROM NORMAL - .44
SEPTEMBER 1968	CLIMATOLOGICAL DATA	NORTH COAST DRAINAGE 01	SALYER R S	AVERAGE MAXIMUM TEMPERATURE 85.1M, MINIMUM 50.8M, AVERAGE 68.0M, DAYS WITH 90° OR MORE & TOTAL PRECIPITATION MISSING
SEPTEMBER 1968	CLIMATOLOGICAL DATA	NORTH COAST DRAINAGE 01	WILLOW CREEK 1 NW	ALL DATA SHOULD BE MISSING
SEPTEMBER 1968	DAILY TEMPERATURE	NORTH COAST DRAINAGE 01	SALYER R S	AVERAGE MAXIMUM,85.1, AVERAGE MINIMUM TEMPERATURE 50.8; MAXIMUM & MINIMUM TEMPERATURES 28TH, 29TH, & 30TH MISSING
SEPTEMBER 1968	DAILY PRECIPITATION	NORTH COAST DRAINAGE 01	POTTER VALLEY P H	TOTAL PRECIPITATION .11, AMOUNT ON 14TH .11
SEPTEMBER 1968	DAILY PRECIPITATION	NORTH COAST DRAINAGE 01	SALYER R S	TOTAL PRECIPITATION, AMOUNT ON 28TH, 29TH, & 30TH, ALL MISSING
SEPTEMBER 1968	ALL TABLES	SAN JOAQUIN DRAINAGE 05	THREE RIVERS EDISON P H #2	DELETE DATA; SEE DELAYED DATA FOR CORRECT DATA

CORRECTIONS

REFERENCE NOTES

Additional information regarding the climate of California may be obtained by writing to the Environmental Science Services Administration State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco, California 94102, or to any Weather Bureau Office near you. Additional precipitation data are contained in "HOURLY PRECIPITATION DATA CALIFORNIA" and Storage-Gage Precipitation Data for Western United States".

DIMENSIONAL UNITS Unless otherwise indicated, dimensional units used in this bulletin are Temperature in F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F in Supplemental Data table directions entered in figures are tens of degrees. Resultant wind is the vector sum of wind directions and speeds divided by the number of observations.

OBSERVATION TIME The Station Index shows observation times in local standard time During the summer months some observers take the observations on daylight saving time. Snow on ground in the 'Snowfall and Snow on Ground' table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 4 00 a.m., P.S.T., except for Bishop WB AP, Blue Canyon WB AP, and Sandberg WB, which are taken at 6:00 a.m., P.S.T., and Mt Shasta WB City at 8 00 a.m., P.S.T. Data in the "Extremes" table, 'Daily Precipitation' table, 'Daily Temperature" table, 'Evaporation and Wind' table, and snowfall in the 'Snowfall and Snow on Ground" table, when published, are for the 24 hours ending at time of observation.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the 'Evaporation and Wind' table Max and Min in 'Evaporation and Wind' table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation

WATER EQUIVALENT values published in the Snowfall and Snow on Ground table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations, consequently, occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record

SNOWFALL Entries of snowfall in the "Climatological Data' table, the "Snowfall and Snow on Ground' table, and in the 'Seasonal Snowfall table, include snow and sleet. Entries of snow on ground include snow, sleet, and ice.

NORMALS for all stations are climatological standard normals based on the period 1931-1960.

DIVISIONS, as used in this publication, became effective with data for January 1941

STATION NAMES Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

SEASONAL TABLES Monthly and seasonal snowfall and heating degree days for the 12 months ending with the preceding June data will be carried in the July issue of this bulletin.

DELAYED DATA AND CORRECTIONS will be carried only in the June and December issues of this bulletin.

INTERPOLATED VALUES for monthly precipitation totals may be found in the annual issue of this publication.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

- No record in the "Supplemental Data' table, 'Daily Precipitation' table, "Evaporation and Wind table, 'Snowfall and Snow on Ground' table, 'Daily Maximum Temperature' table, and the Station Index

  No record in the 'Climatological Data' table and the "Daily Temperature' table is indicated by no entry.

+ And also on an earlier date or dates.

++ Highest observed one minute windspeed. This station is not equipped with an instrument to measure fastest mile data.

• Amount included in following measurement, time distribution unknown.

/ Gage is equipped with a windshield.

B Adjusted to a full month.

D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.

M One or more days of record missing. If average value is entered, less than 10 days record is missing. See "Daily Temperature' table for detailed daily record Degree day data, if carried for this station, have been adjusted to represent the value for a full month.

R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data')

T Trace, an amount too small to measure.

V Includes total for previous month.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING

AR This entry in time of observation column in Station Index means after rain.

C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in the 'Hourly Precipitation Data' bulletin. If daily amounts are published in 'Climatological Data' bulletin they are from a separate non-recording gage, except where indicated by reference 'R'. Such amounts may differ from amounts published from the recording gage in the "Hourly Precipitation Data' bulletin.

G 'Soil Temperature' table.

H "Snowfall and Snow on Ground" table Omission of data in any month indicates no snowfall and or snow on ground in that month

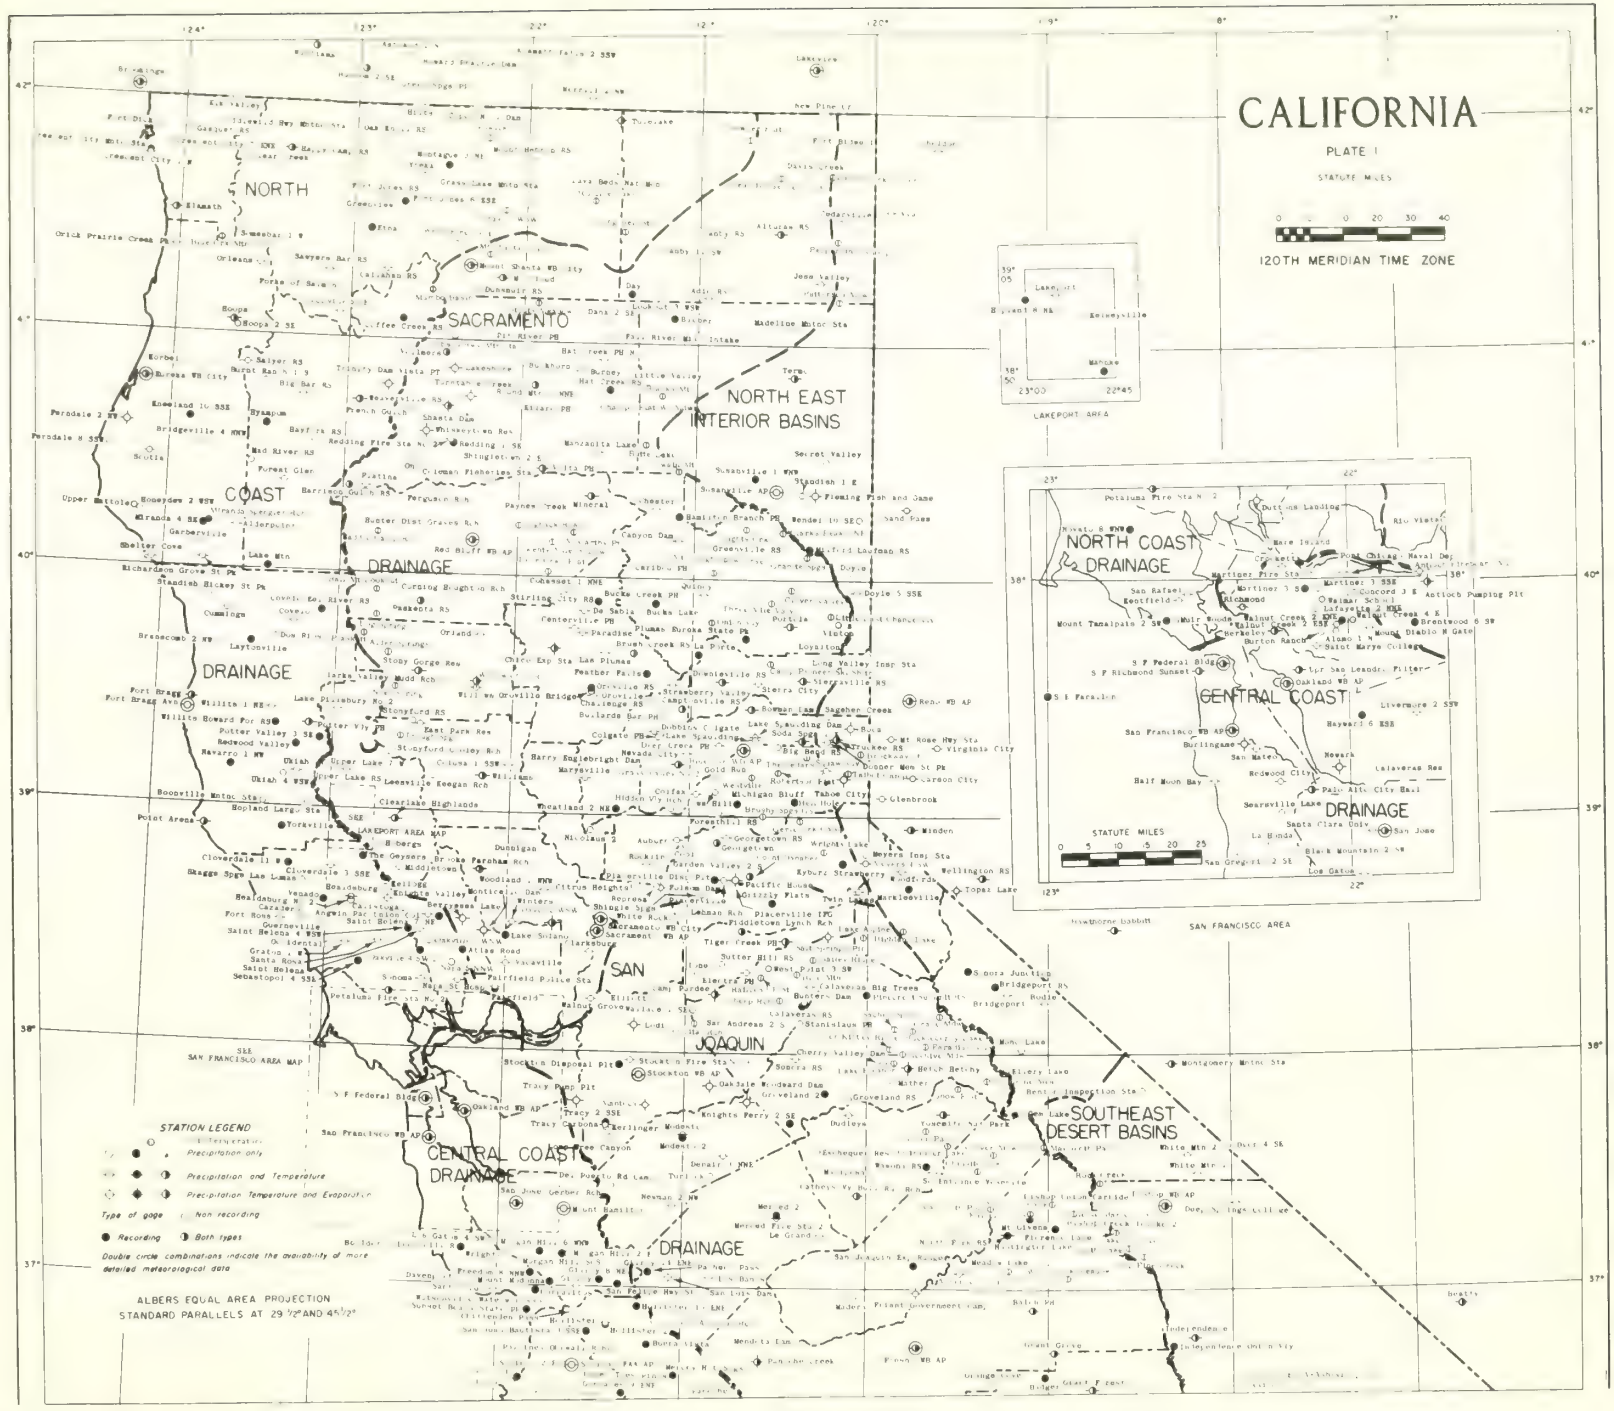
J 'Supplemental Data" table.

S Storage precipitation station. Precipitation measurements, made at irregular intervals will be published later in 'Precipitation Data from Storage-Gage Stations" Bulletin.

SS This entry in time of observation column in Station Index means observation made near sunset.

VAR This entry in time of observation column in Station Index means variable.

Thermometers are generally exposed in a shelter located a few feet above sod covered ground, however, this reference indicates that the thermometers are exposed in a shelter located on the roof of a building.



Stations appearing in the tables with no data were either missing or received too late to be included in this issue

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, CLIMATOLOGICAL DATA NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1957 may be found in the publication "Substation History" for this State, price $1.25. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data, price 15 cents. These publications may be obtained from the Superintendent of Documents at the address shown above.

Subscription Price 20 cents per copy, monthly and annual, $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402

Additional information regarding the climate of California may be obtained by writing to the Environmental Science Services Administration State Climatologist, 557 Federal Office Building, 50 Fulton Street, San Francisco, California 94102, or to any Weather Bureau Office near you. Additional precipitation data are contained in "HOURLY PRECIPITATION DATA CALIFORNIA" and "Storage-Gage Precipitation Data for Western United States".

DIMENSIONAL UNITS. Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches, and wind movement in miles.

EVAPORATION is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the Evaporation and Wind table. Max and Min in Evaporation and Wind table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

NORMALS for all stations are climatological normals based on the period 1931-1960. "DEP" in Table 4 refers to departures from long-term means based on periods varying from 10 to 29 years which are used in place of normals. Except $ indicates standard normals used for Newark departures.

DIVISIONS, as used in this publication, became effective with data for January 1941.

STATION NAMES: Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

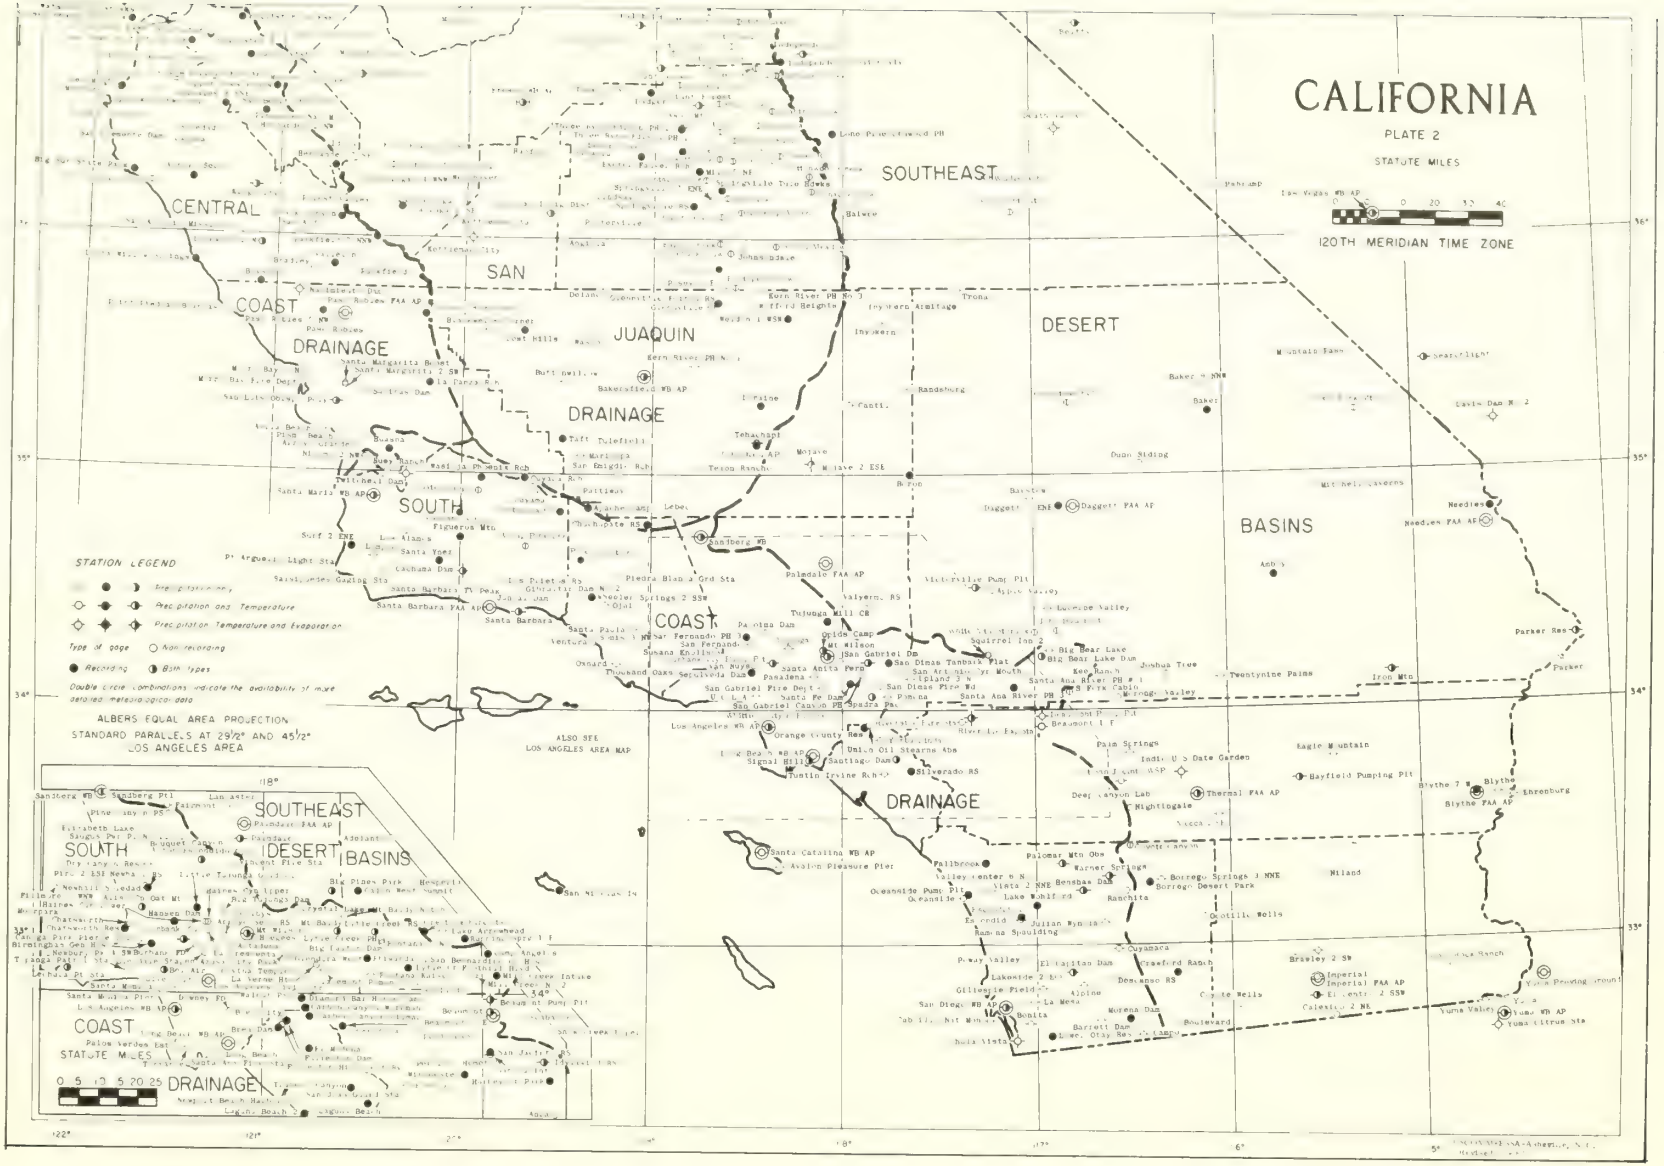
DELAYED DATA AND CORRECTIONS will be carried in the June and December issues of Climatological Data.

IN THE DATA TABLES THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

- No record.
+ Also on earlier date (dates) or months.
* Amount included in following measurement.
  Gage is equipped with a windshield.
B Adjusted to a full month.
E Amount is wholly or partially estimated.
M One or more days record missing; if average value is entered, less than 10 days record is missing. See monthly Climatological Data for detailed daily record.
R Amounts from recording gage. (The amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
T Trace, an amount too small to measure.
V Includes total for previous month. V in annual column means total is for a two-year period.

IN THE STATION INDEX THE SYMBOLS AND LETTERS WHEN USED INDICATE THE FOLLOWING:

Thermometers are generally exposed in a shelter located a few feet above sod covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
C Data for recording rain gage stations processed for special purposes and published in Hourly Precipitation Data. Length of record for recorder-only stations may be found in the annual issue of Hourly Precipitation Data.
G Soil temperatures published.
S Storage precipitation station. Precipitation measurements, made at irregular intervals, will be published later in "Precipitation Data from Storage-Gage Stations" Bulletin.



Years of record as shown in the Station Index are approximate since gaps in records may not have been considered in arriving at the totals shown.

Information concerning the history of changes in location, elevations, exposures, etc., of substations through 1957 may be found in the publication "Substation History" for this State. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402, for $1.25. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; $2.50 per year. (Yearly subscription includes the Annual Summary.) Checks and money orders should be made payable to the Superintendent of Documents. Remittances and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.
